DETAILED ACTION

1. - This communication is in response to amendment filed 3/9/04.

Response to Amendment

2. Claims 11, 24, 37, 48 and 58-61 have been canceled, claims 1, 15, 28, 41 and 49 have been amended per request.

3. claims 1-10, 12-23, 25-36, 38-47, 49-55 and 62-66 are pending and have been allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

5. The claimed inventions pertain to a method and apparatus for surrogate control of electronic commerce transactions that include a surrogate system through which an individual without credit card is enabled to shop at online merchant sites.

6. The following prior art references have been deemed most relevant to the allowed claim(s):

a. Solokl et al. (US Pat. 6,173,269) (Solokl) teaches a method and apparatus for executing electronic transactions where the transactions are limited to those vendors that

have been pre-approved. A "passport account" is established and funded from the purchaser's savings accounts, checking accounts or credit card accounts. Once funded, the passport account is available to enter into on-line transactions with merchants.

b. Boesch (US Pat. 6,295,522) (Boesch) teaches a system and method for the use of stored value cards when either a consumer or a merchant does not possess a stored value card. A consumer value acquirer receives funds from the bank account of a given consumer and has a pool of stored value cards that are not assigned to any specific consumer but which are used on behalf of consumers wishing to purchase

goods or services via stored value card transaction. The consumer value acquirer acts as a proxy for the consumer and uses one of the pool of stored value cards on behalf of the consumer in a transaction with a merchant that uses stored value cards. Once funds stored value card funds are transferred to the merchant during a transaction, the consumer account with the consumer value acquirer is debited the amount of the transaction.

Solokl and Boesch as discussed above as the Closest Prior art of record fails to teach or suggest a method (claims 1-10, 12-14, 62), a system (claims 15-23 and 25-27, 63) a device, a computer readable medium or an electromagnetic medium (claims 28-36, 38-47, 49-55, 64-66), for surrogate control of electronic commerce transactions which comprises the novel features outlined as follows:

Art Unit: 3624

Claims 1-10, 12-14, 28-36, 38-47, 49-55, 62, and 64-66 : accessing at least one electronic commerce system (i.e. a merchant web site which facilitates a purchase transaction) through a surrogate electronic system where at least one credit card account is selected in the surrogate electronic system, funds due for the purchase transaction are transferred from a funded surrogated account to the credit card account and transactions for the credit card account are reconciled by maintaining a surrogate system ledger including at least one balance for the surrogate account and a corresponding purchase transaction record.

Claim 15-23, 25-27, and 63: accessing at least one electronic commerce system (i.e. a merchant web site which facilitates a purchase transaction) through a proxy server where payment for a purchase transaction is funded using a surrogate funding source loaded with funds from a user account, wherein the proxy server reconciles transactions for the user account, the reconciling includes maintaining a surrogate system ledger including at least one balance for the user account and a corresponding purchase transaction record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Loeb (US Pat. 6,360,209) teaches a credit card billing system which permits multiple items purchased as part of a single transaction or order to be separately billed on a credit card in accordance with a payment schedule designed to minimize inquiries regarding the overall order by the customer.
